BAITS WHICH CONTAIN AMINO ACIDS
FOR CATCHING ICTALURID CATFISH AND
FISH WITH SIMILAR FEEDING BEHAVIOR

ABSTRACT

of the disclosure

A bait ~~or lure~~ for catching Ictalurid catfish, and fish with similar feeding behavior, containing the free amino acids: L-proline, L-alanine, and L-arginine, and mixtures thereof, at concentrations above those normally found around fish's natural foods is provided to increase the likelihood of snapping or biting of the bait or lure by the fish.
